

# SCRAMBLE CODE and DECODE GRIDS 6 x 8

## CODE GRID:

Write the letters of your message across the rows. Put one letter in each box in order 1,2,3,4... Fill any unused boxes at the end with random letters.

1	2	3	4	5	6
7	8	9	10	11	12
13	14	15	16	17	18
19	20	21	22	23	24
25	26	27	28	29	30
31	32	33	34	35	36
37	38	39	40	41	42
43	44	45	46	47	48

Now copy the letters out working down the columns of the grid to make your coded message. The numbers are a guide to show you where each letter goes.

1	7	13	19	25	31	37	43	2	8
14	20	26	32	38	44	3	9	15	21
27	33	39	45	4	10	16	22	28	34
40	46	5	11	17	23	29	35	41	47
6	12	18	24	30	36	42	48		

Copy out the coded message on blank paper (without the little numbers!) and send it!

## DECODE GRID:

Write the letters of the coded message down the columns. Put one letter in each box in order 1,2,3,4...

Now copy the letters out working along the rows. The decoded message will appear!

1	9	17	25	33	41
2	10	18	26	34	42
3	11	19	27	35	43
4	12	20	28	36	44
5	13	21	29	37	45
6	14	22	30	38	46
7	15	23	31	39	47
8	16	24	32	40	48

1	9	17	25	33	41	2	10	18	26
34	42	3	11	19	27	35	43	4	12
20	28	36	44	5	13	21	29	37	45
6	14	22	30	38	46	7	15	23	31
39	47	8	16	24	32	40	48
