

PRIME

NUMBERS!

1/ Ignore the number 1.

2/ Draw a little star around the number 2. Colour in all the other numbers that divide by 2.

(You should get stripes up and down the page!)

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

3/ Draw a little star around the number 3. Colour in all the other numbers that divide by 3. Don't colour in any numbers that are already coloured in.

4/ Skip number 4 because it is already coloured in.

5/ Draw a little star around the number 5. Colour in all the other numbers that divide by 5.

6/ Skip number 6 because it is already coloured in.

7/ Draw a little star around the number 7. Colour in all the other numbers that divide by 7. There are only three of them left to colour in. Can you find them?

★ You can use different colours for the numbers that divide by 2, 3, 5 and 7!

ALL THE NUMBERS WITH STARS AND ALL THE NUMBERS NOT COLOURED IN ARE PRIME NUMBERS!

★ Pick any EVEN number bigger than 6. Can you find TWO different prime numbers that add up to make it?

★ Pick any ODD number bigger than 17. Can you find THREE different prime numbers that add up to make it?
